Experience

Experienced in administrating a Windows server(friend project) with an assortment of websites and services. Wrote a multitude of features using JS and PHP for an active forum on the said server: embedded custom audio player, reply previews, dynamic page contents, moderation tools and various design improvements.

Currently maintaining number of open source projects, including, but not limited to:

Various projects written using contemporary frontend tools and BEM methodology: <https://performanceartist.github.io/>

Fully functional chat written with Node/Express and deployed to Heroku: [node_chat](#)

Various useful functions for JS(array utilities, ajax requests, bit flags): [js_modules](#)

Personal blog with registration, tag system, comments and multiple image uploads built from scratch(PHP): [blog](#)

Online text-based game, which combines Haskell application and PHP frontend: [colonize](#)

Education

TUSUR, Informational Security (2015-2019...) - unfinished as of now.
